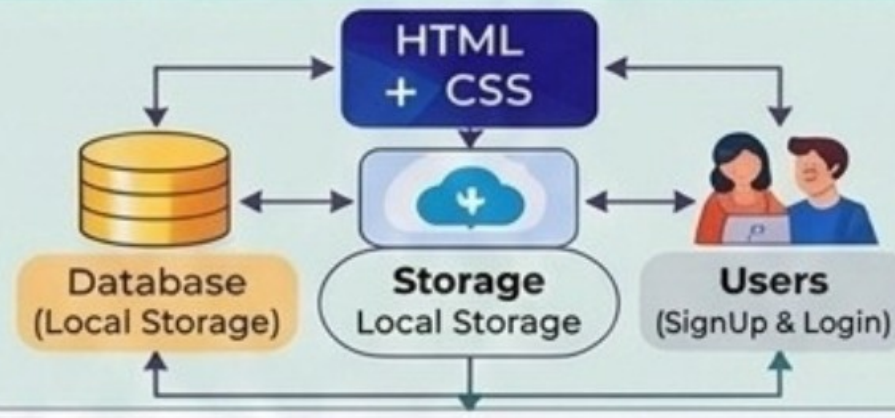
Dynamic Student Ranking And Records

PROJECT BASED LEARNING FROM FWD

ABSTRACT

The Dynamic Student Ranking and Records System is a web application developed using HTML, CSS, and JavaScript to manage student details and display ran- based on marks. It allows users to sign up, log in, add, search, sort, and delete student records, displaying the information dynamically in a table.

SYSTEM ARCHITECTURE

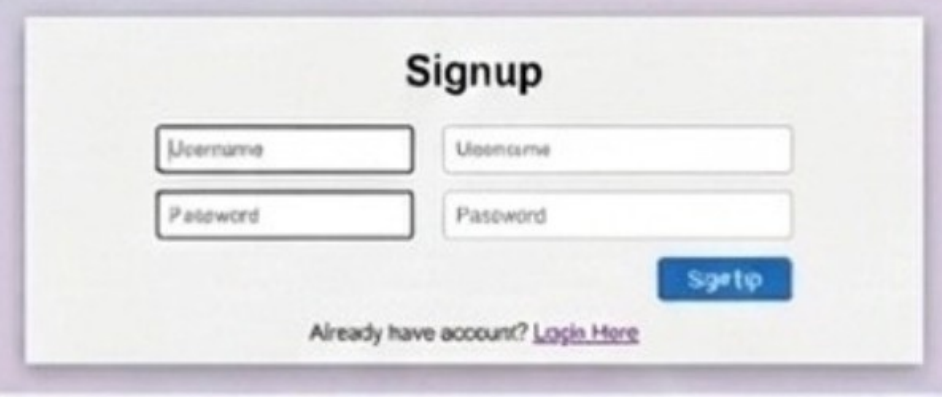


CO-WISE IMPLEMENTATION

CO1 – Internet Fundamentals, HTML & Introductory CSS

- ✓ HTML document structure and semantic tags
- ✓ Use of headings, paragraphs, and links
- ✓ CSS syntax and selectors for styling
- ✓ Typography, colors, margins, padding, and borders
- ✓ Designing the basic layout of the student dashboard

CO1



CO2 – HTML Forms, Semantic Tags & CSS Layouts

- ✓ Signup and Login forms using HTML form elements
- ✓ Input fields such as text, number, and password
- ✓ Form validation using required attributes
- ✓ Table structure for displaying student records
- ✓ CSS layout design using Flexbox
- ✓ Responsive UI design and interactive styling

CO2

CO3 – JavaScript Programming Essentials

- ✓ JavaScript variables, operators, and conditions
- ✓ Loops and functions for program logic
- ✓ Arrays and objects to store student records
- ✓ Functions for adding and managing students
- ✓ Sorting student marks using JavaScript logic

CO4 – JavaScript Interactivity, DOM & Events

- ✓ Event handling using button clicks
- ✓ DOM manipulation to update student records dynamically
- ✓ Table content updated using JavaScript
- ✓ Browser storage (Local Storage) for saving user data
- ✓ Interactive user actions such as search, add, and ...

CO5 – Advanced Web Development & Deployment

- ✓ JavaScript form validation for signup and login
- ✓ Handling user input dynamically
- ✓ Exception handling for incorrect inputs
- ✓ Modular JavaScript structure
- ✓ Basic optimization and structured web project deployment

CONCLUSION & FUTURE SCOPE

This project demonstrates the implementation of core web development concepts including HTML structure, CSS styling, JavaScript logic, and DOM manic successfully manages student records and rankings with an interactive interface.
